## EDUCATION

---

### University of Illinois Urbana-Champaign

*Master of Computer Science (MCS)*

Champaign, IL

Aug 2024 – Dec 2025 (*Expected*)

### National Taiwan University

*Bachelor of Science in Computer Science and Information Engineering (CSIE)*

Taipei, Taiwan

Sep 2017 – Jun 2021

- **Honors:** Dean's List Award - 1st semester of 2020-2021 at EECS CSIE
- **Last Two Year GPA:** 4.02 / 4.3

## EXPERIENCE

---

### Academia Sinica

*Research Assistant*

Taipei, Taiwan

Apr 2024 – Jun 2024

- Initiated research on 3D Gaussian splatting(3DGS) for deepfake generation and detection
- Proposed a novel representation to effectively distinguish whether a set of images was generated by 3DGS
- **Relevant Skills:** 3D Gaussian Splatting, 3D Avatar, Computer Graphics

### Quantrend Technology

*Machine Learning Engineer*

Taipei, Taiwan

Jun 2021 – Aug 2023

- **Enhanced the online trading model's returns by 5%** by proposing a novel data sampling and labeling method, resulting in outputs more closely approximating real market performance
- Increased the R-squared score of certain features by **10x** by introducing a novel feature engineering method
- Designed **over 70%** of the company's Machine Learning metrics and **20%** of the features used in our models
- Independently designed the company's proprietary Rust implementation of TensorFlow Models
- **Relevant Skills:** Rust, Python, OOP, Machine Learning, Linear Algebra, Probability, Stochastic Processes

### OmniEyes

*Research Assistant*

Taipei, Taiwan

Sep 2020 – Jun 2021

- Enhance the computer vision-based mapping system by detecting newly emerged signboards using Metric Learning
- Surveyed and experimented with Metric Learning techniques (Siamese, Triplet) for fine-tuning purposes
- Designed a data augmentation mechanism to synthesize new signboards data and improve model scores
- **Relevant Skills:** Python, PyTorch, Machine Learning, Contrastive Learning, Object Detection

### CancerFree Biotech

*Intern*

Taipei, Taiwan

Jul 2020 – Aug 2020

- Developed a stained cell counting program using thresholding to replace existing paid software
- Designed a report generation pipeline with Python adhering to the open-closed principle
- **Relevant Skills:** Python, NumPy, Computer Vision, Thresholding

## PROJECTS

---

### 3D Reconstruction for Enhanced Intraoral Scanning

Feb 2024 – Present

- Exploring state-of-the-art 3D reconstruction techniques through ongoing research with Ma et al. from the University of Pennsylvania, aimed at enhancing intraoral scanning
- **Relevant Skills:** 3D Gaussian Splatting, NeRF, Structure from Motion, Computer Graphics

### Periodontitis-Associated Cardiovascular Diseases Classification

Sep 2020 – Jan 2021

- Identify periodontitis and atherosclerotic cardiovascular disease (ASCVD) by analyzing panoramic radiographs
- **Publication:**  
Ma, K.S., Liou, Y.J., Huang, P.H., Lin, P.S., Chen, Y.W., Chang, R.F. (2021).  
"Identifying Medically-compromised Patients with Periodontitis-Associated Cardiovascular Diseases Using Convolutional Neural Network-facilitated Multilabel Classification of Panoramic Radiographs."  
*Proceedings of the International Conference on Applied Artificial Intelligence*, pp. 1-4.
- **Relevant Skills:** PyTorch, CNN, U-Net

## SKILLS

---

**Languages:** C/C++, CUDA(C++), Python, Java, Rust, HTML/CSS, JS, php, SQL

**DS/ML:** Time Series, Contrastive Learning, 3D Reconstruction, PyTorch, TensorFlow, NumPy, Pandas, Matplotlib
